

Submersible/Surface Jet Pump

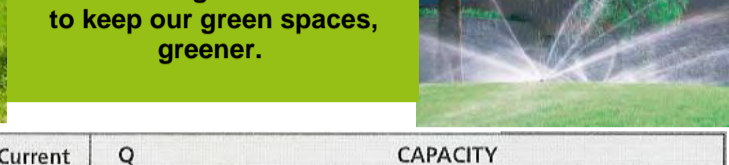

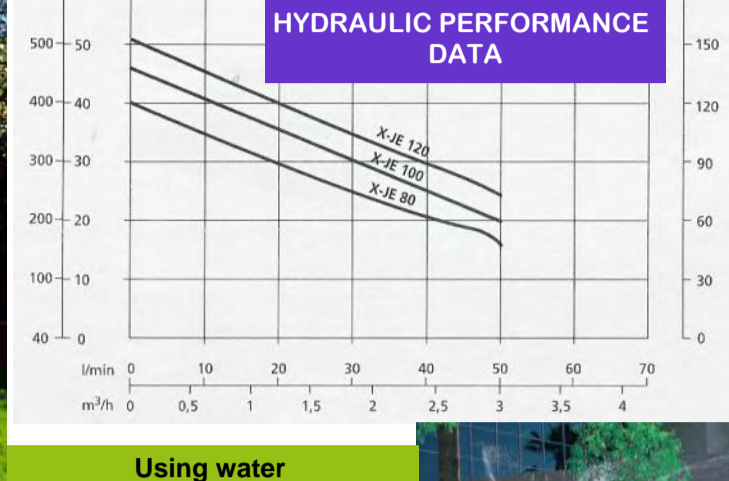

Technical Data Sheet X-AJEP

Fully Automatic Submersible Pump.

The X-AJEP range of pumps have an electronic pressure sensing system built into the pump body, this enables the pump to be controlled from any water tap and gives the water system a pressurised supply. The pump automatically switches on when the water pressure drops to 1.5 bar and runs until the flow is detected to cease, a hold on timer then keeps the pump running for a further 10 seconds.

The pump is self priming, submersible and water cooled, should the water supply fail the pump will switch off thereby protecting itself from damage. Being water cooled it can also be used on the surface.

Three sizes are available from 0.8 hp to 1.2 hp.

CODE	VoIt. Hz 50	Nominal Power P ₂		Capacitor		Input Current Amp. 1 - 230	CAPACITY					
		kW	HP	µF	Vc		Total head					
X-JE80	230	0,60	0,8	16	450	4,5						
X-JE100	230	0,75	1	18	450	5,3						
X-JE120	230	0,90	1,2	20	450	5,9
